Candidate's consent to nomination Election of a Vice President of FIG

Dear FIG members,

As the president of Chinese Academy of Surveying and Mapping, I feel very privileged to be nominated for election of a vice president of FIG for the period 2019-2022. If elected, I will dedicate to the development of the federation as well as the progress of our beloved profession.

I am a leading scientist in surveying and mapping and geoinformation in China, having collaborative published over 330 articles in reputation journals and 7 books, won 5 prestigious National Award of Science and Technology Progress of China and one Geospatial World Excellence Awards. I have rich experiences in international academic exchanges, including my past efforts in organizing 15 international conferences/workshops and making 60+ international invited presentations in surveying, mapping and geoinformation.

In my many past experiences in the international and domestic academic and professional communities, such as International Society for Photogrammetry and Remote Sensing, Chinese Society for Surveying, Mapping and Geoinformation, China Association for Geographic Information Society and Chinese Society for Land Science, I have been devoting myself to the missions and goals of each community. As the Chair of ISPRS WG VII/6, I was awarded the prize of President's Honorary Citation for my meritorious contributions to the operation of the ISPRS Commission VII at the XXI Congress of ISPRS in 2008. I believe these significant experiences in scientific management should be useful to the works of the FIG in the future.

I look forward to serving the FIG. Thank you very much for your kind considerations.

Best regards,

Jixian ZHANG
