

# GIS - Enabling better land administration

Nick Land, ESRI Europe

FIG Com.7 Meeting, Verona, 11- 14 September 2008

# We Live in a Rapidly Changing World

*Increasingly Driven by Population Growth & Human Action*

## Impacting the Natural World

- Climate
- Biodiversity
- Natural Resources
- Energy
- Economy
- Security

*Challenges Sustainability . . .  
. . . For All of Us*

# Global Network of Survey & GIS Professionals

## ESRI User Conference 2008

- 14,000 GIS Professionals
- 121 Countries
- Many Disciplines & Interests

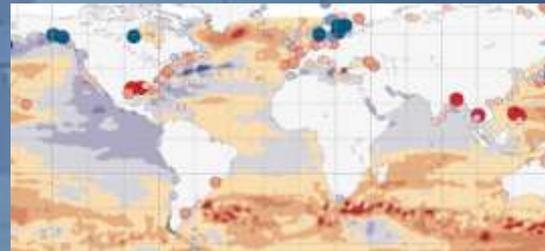

*... GIS in action*

# Impacts of Global Climate Change

Vegetation Trends  
*Arctic*

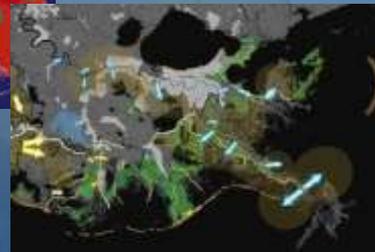

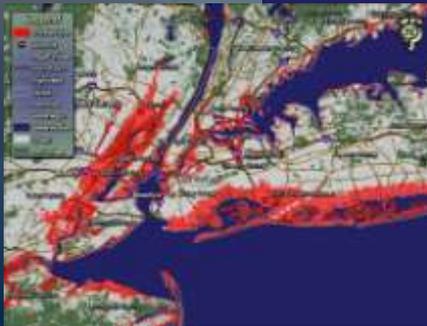

Sea Level Change  
*Global*

Sea Level Rise Modeling  
*Florida*

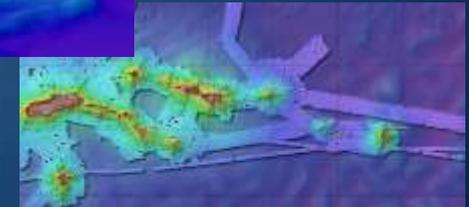

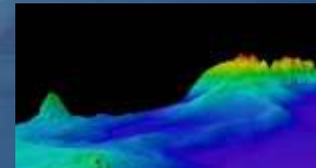

*New York*

Coastal Zone Planning  
*Louisiana*

Continental Shelf  
*Portugal*

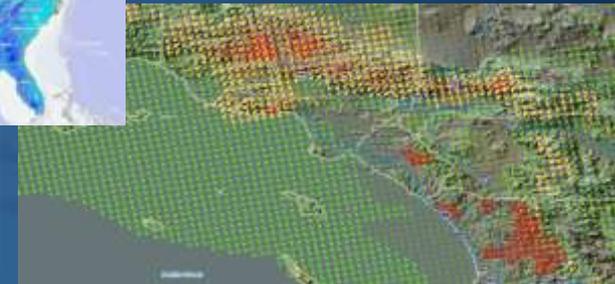

Oceanographic Studies  
*American Samoa*

# Climate & Renewable Energy

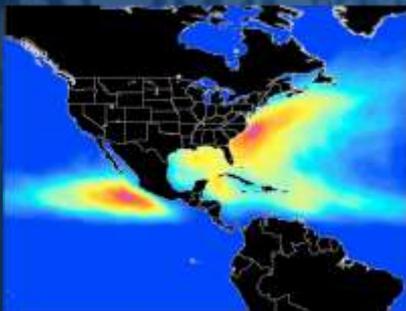

Wind Farm Design  
*Massachusetts*

Wind Generation Potential  
*U.S.A.*

Tropical Cyclones  
*National Hurricane Center*

Solar Energy Potential  
*Washington*

Weather Monitoring  
*U.S.A.*

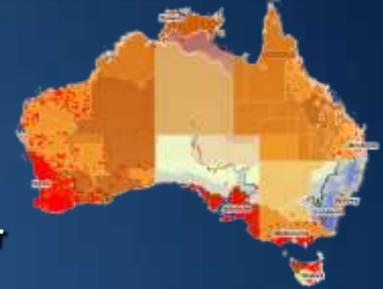

Wind Modeling  
*California*

# Earth Science & Water Resources

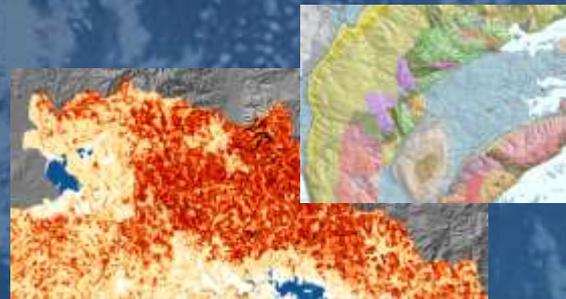

Online Soil Information  
*Australia*

Groundwater  
*Texas*

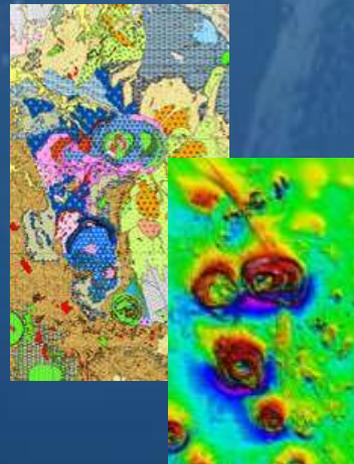

Geologic Mapping  
*Canada*

Soil Moisture  
*Michigan*

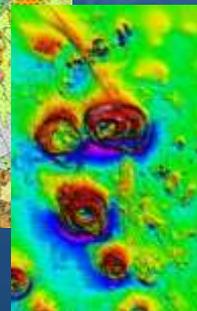

Landslide Susceptibility  
*El Salvador*

Seismic Hazards  
*Indonesia*

Geologic Analysis  
*Madagascar*

Flood Risk  
*Portugal*

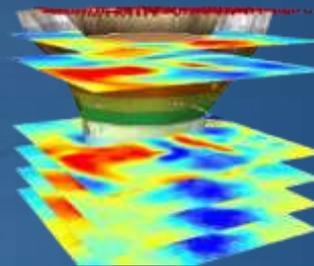

# Natural Resource Management

Mining Tracks  
*Brazil*

Diamond Mining  
*Africa*

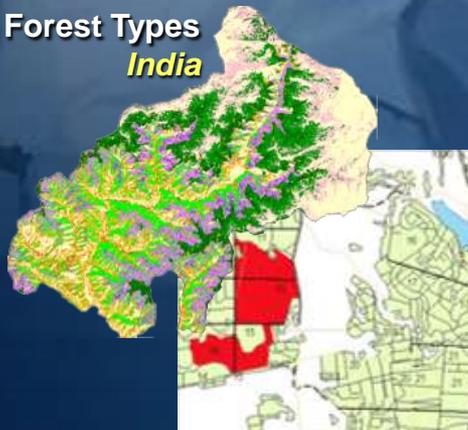

Well Production  
*Canada*

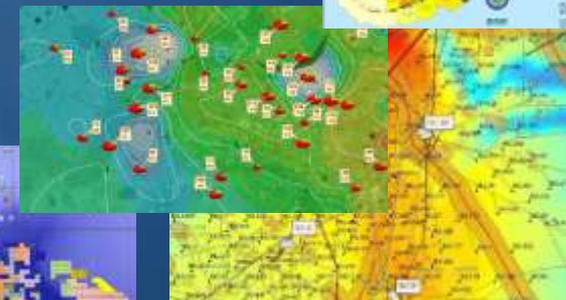

Oil & Gas Reserves  
*U.S.*

Forest Types  
*India*

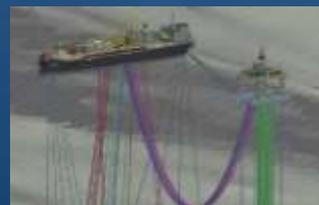

Oil Production  
*Russia*

Wells & Pipelines  
*Mexico*

Offshore  
*Brazil*

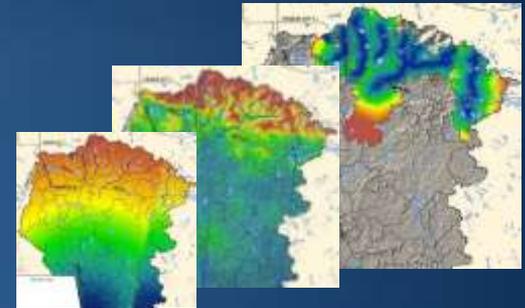

Petroleum Resources  
*Kuwait*

Forest Inventory  
*Lithuania*

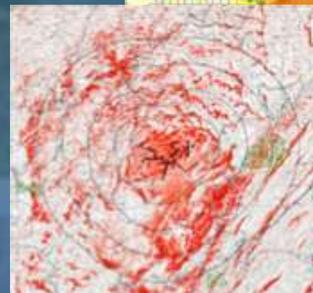

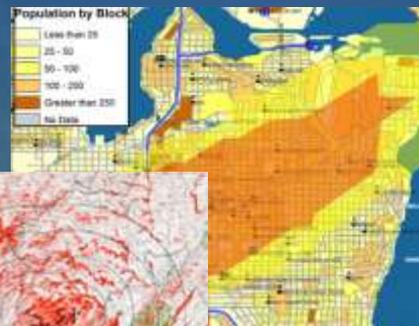

Oil & Gas Leases  
*Gulf of Mexico*

# Environmental Assessment

Nitrate Modeling  
*Florida*

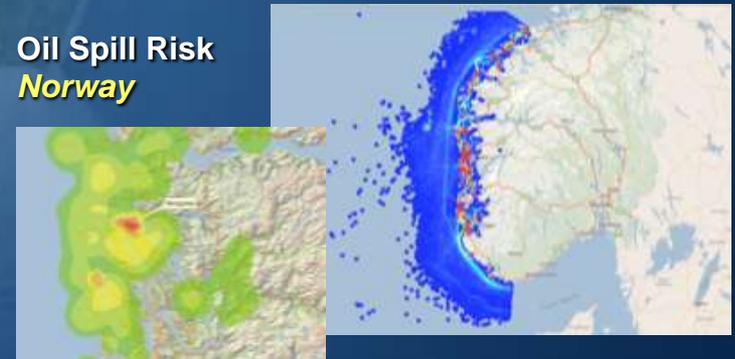

Chemical Release  
*Washington*

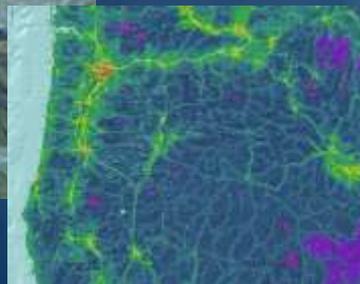

Viewshed

Oil Spill Risk  
*Norway*

Ship Traffic  
*Norway*

Highway Impacts on Habitat  
*California*

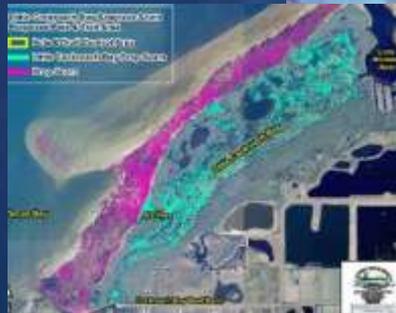

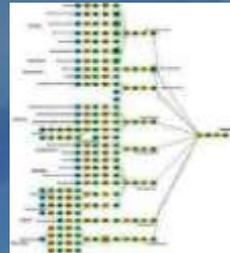

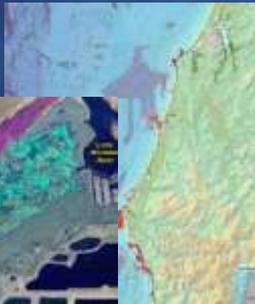

Human Footprint  
*Oregon*

# Conservation

## Healthy Parks & Healthy Communities *The Trust for Public Lands*

### Nearshore Environmental Management *Oregon*

### Sea Grass Management *Florida*

### Benthic Habitats *NOAA*

### Fish Passage Barriers *US Fish & Wildlife*

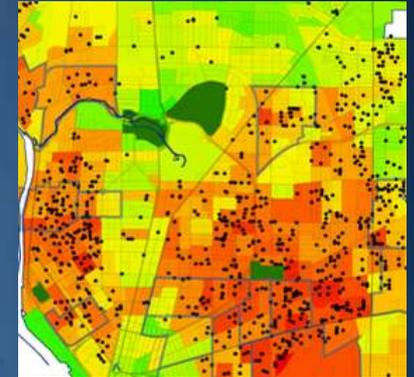

### Priority Conservation Lands *Quinalt Indian Nation*

### Land Cover *Guam*

# Social Issues & Human Health

Opium Cultivation  
*Afghanistan*

Reconstruction  
*Iraq*

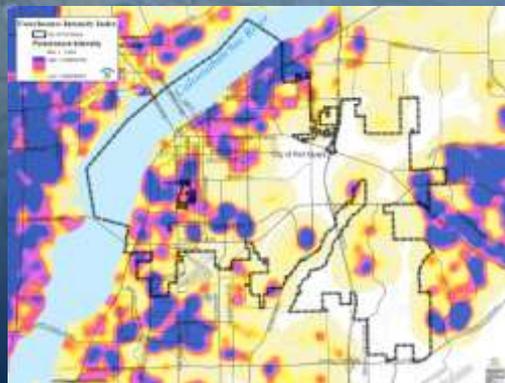

Lead Hazards  
*Buffalo, New York*

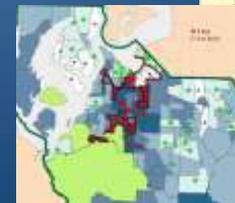

Humanitarian Aid  
*Darfur*

Children Out Of School  
*Ethiopia*

Housing Foreclosures  
*Florida*

Teenage Births  
*King County, Washington*

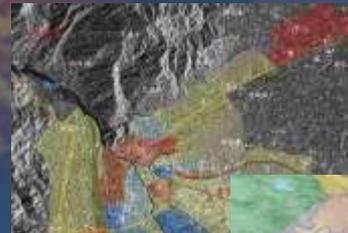

# Managing Natural Disasters

Flood Mapping  
*Iowa*

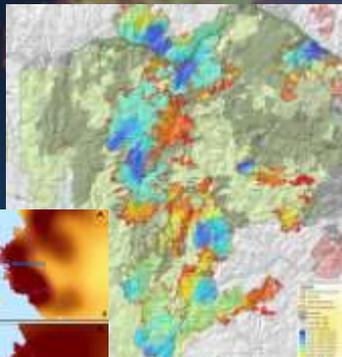

Floods  
*Bihar, India*

Wenchuan Earthquake  
*China*

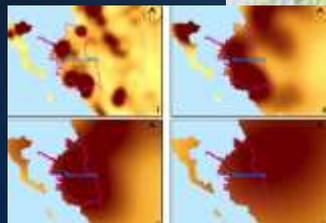

Wildfire  
*Idaho*

Aftershocks

Floods Simulation  
*Houston*

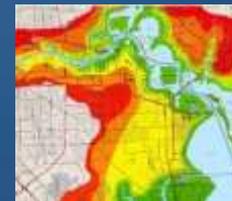

Fire History  
*Greece*

Earthquake  
Damage  
*Japan*

Hurricane Risk  
*Texas*

Tornado  
*Alabama*

Cyclone  
*Myanmar (Burma)*

# Planning

Urban Planning  
*California*

Urban Design  
*San Jose, California*

Land Use Suitability  
*Montana*

Web Based Suitability  
*North Carolina*

Urban Redevelopment  
*Bakersfield, California*

Virtual City  
*Bangkok*

Online Community  
Planning  
*U.K.*

Regional Planning  
*Puerto Rico*

3D Zoning  
*Portland, Oregon*

*Arizona*

# Land Administration

Integrated Land Management  
*BLM*

Analyzing Transactions  
*Philadelphia*

Property Valuation  
*Germany*

*Canada*

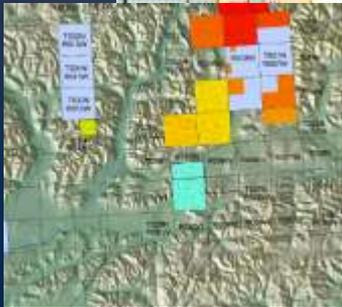

Adapx Pen-Based Sketching  
*USAID-Timor Leste*

Tax Mapping  
*Connecticut*

Native Land Selection  
*Alaska*

*Encinitas*

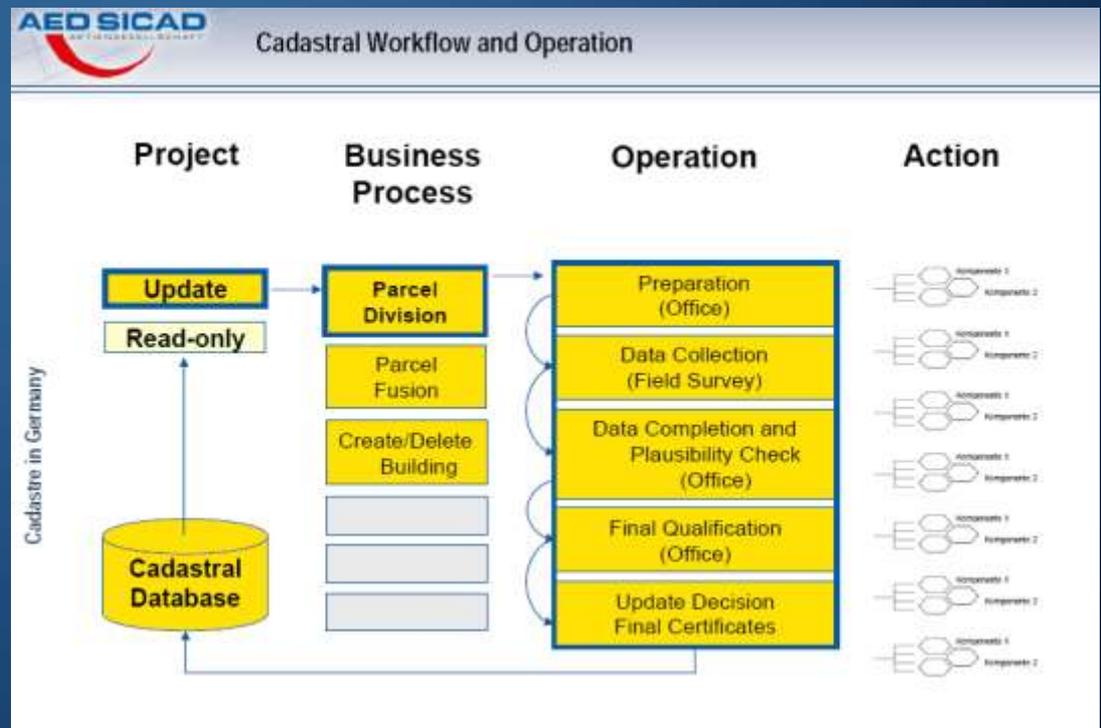

# Land Administration – a number of challenges

- Meeting rising user expectations
- Financial
- Building synergies & partnerships
  - People & organisations
  - Data & services
  - NSDIs
- Standards (& data models)
- Data quality, reducing data redundancy
- Each country, each implementation, has its specific challenges

*... Leverage GIS & our professional knowledge to address these challenges .....*

# 1. ROI, Workflow, Requirments

- Understand the costs (investment) & benefits (value)
- Analyse & improve the workflow

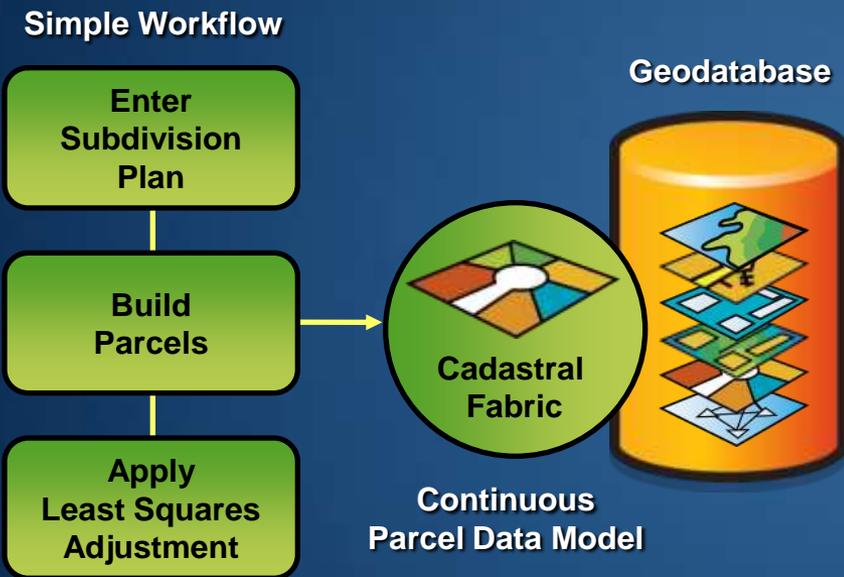

## 2. From cadastral survey to public access

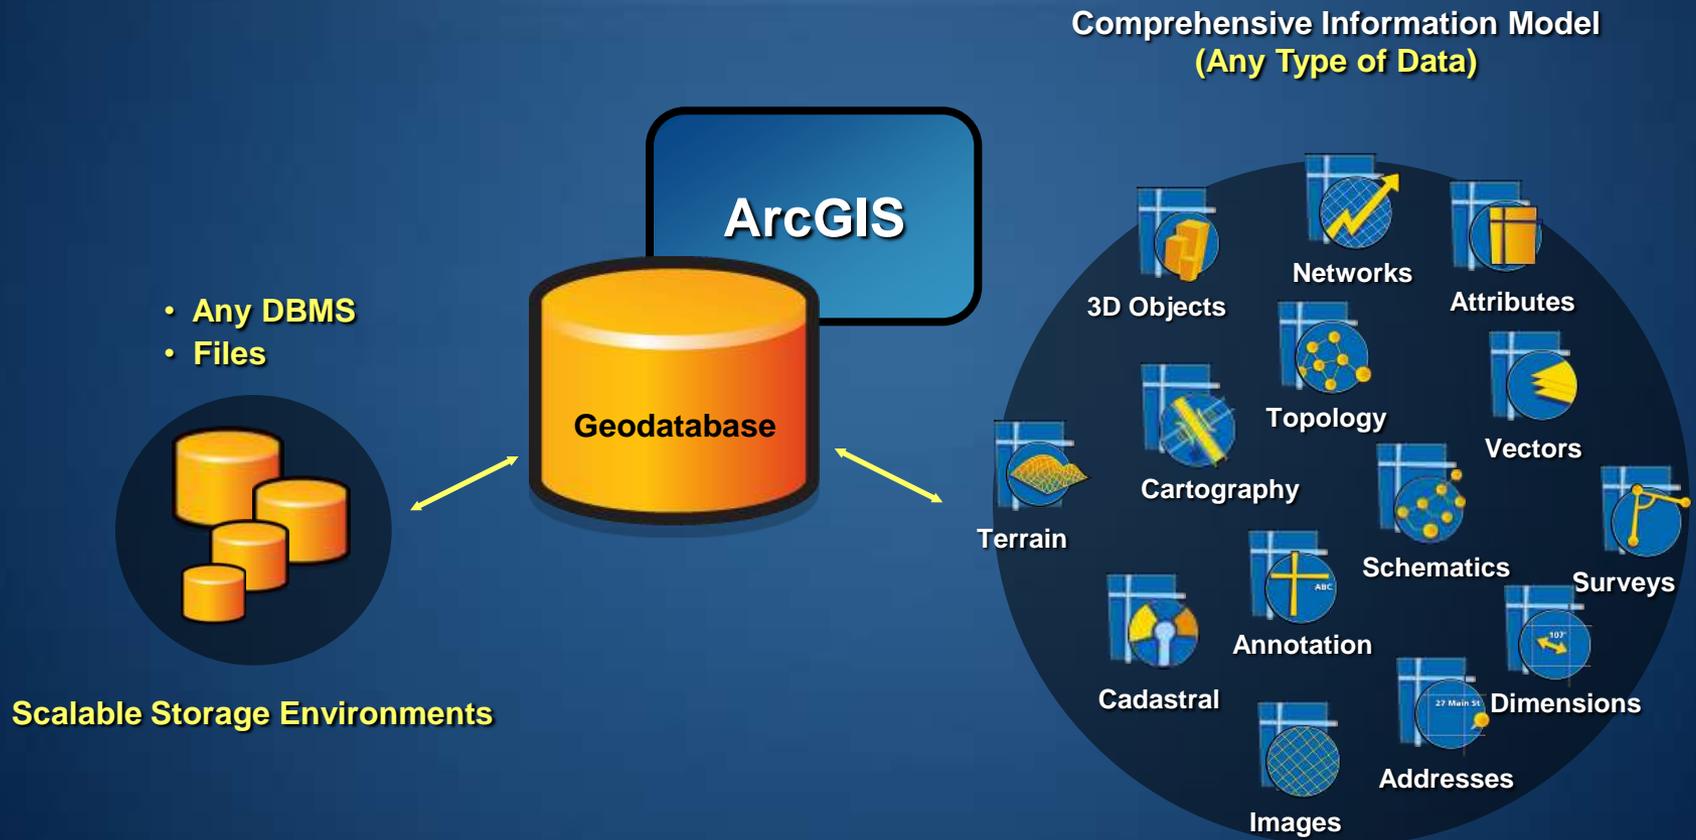

# 4. Quality improvement – Creating Accurate Parcel Data

*... Building On Your Existing Parcel Management*

# 5. Data management

## Organising, Managing, Securing land & geographic information

# 6. Performance & Scalability

... Open & Interoperable

# 7. GIS On The Web Is Just Beginning

## WEB GIS

*Harnessing the Web . . .  
. . . And the Power of GIS*

*Going Far Beyond Mapping & Visualization . . .  
. . . Ultimately Becoming Essential Infrastructure*

# 7. ArcGIS Server Patterns

# 8. Cadastre as a key part of the Spatial Data Infrastructure

1. Coordinate reference systems
2. Geographical grid systems
3. Geographical names
4. Administrative units
5. Addresses
6. **Cadastral parcels**
7. Transport networks
8. Hydrography
9. Protected sites

1. Elevation
2. Land cover
3. Orthoimagery
4. Geology

Thank you for your attention!
