**Country Report of
FINLAND**

**FIG Commission 7
Annual Meeting 2008
13 September
Verona, Italy**

FACTS ABOUT FINLAND

- Land area 304,530 km²
- Water area 33,615 km²
- Total area 338,195 km²
- Population 5.2 million (67% in towns)
 - 17 inhabitants per km²
 - 19 counties
 - 416 municipalities
- 2.1 million cadastral units
- 5.0 million parcels

THE CORE PROCESSES OF NATIONAL LAND SURVEY (NLS)

Management processes

Process of basic land surveys (e.g. subdiv.)

Process of valuations (e.g. expr.)

Process of topographic data production

Process of customer and ordered services

Process of reallocations

Process of maintaining legal registers

Support processes

TOPICAL IN FINLAND:

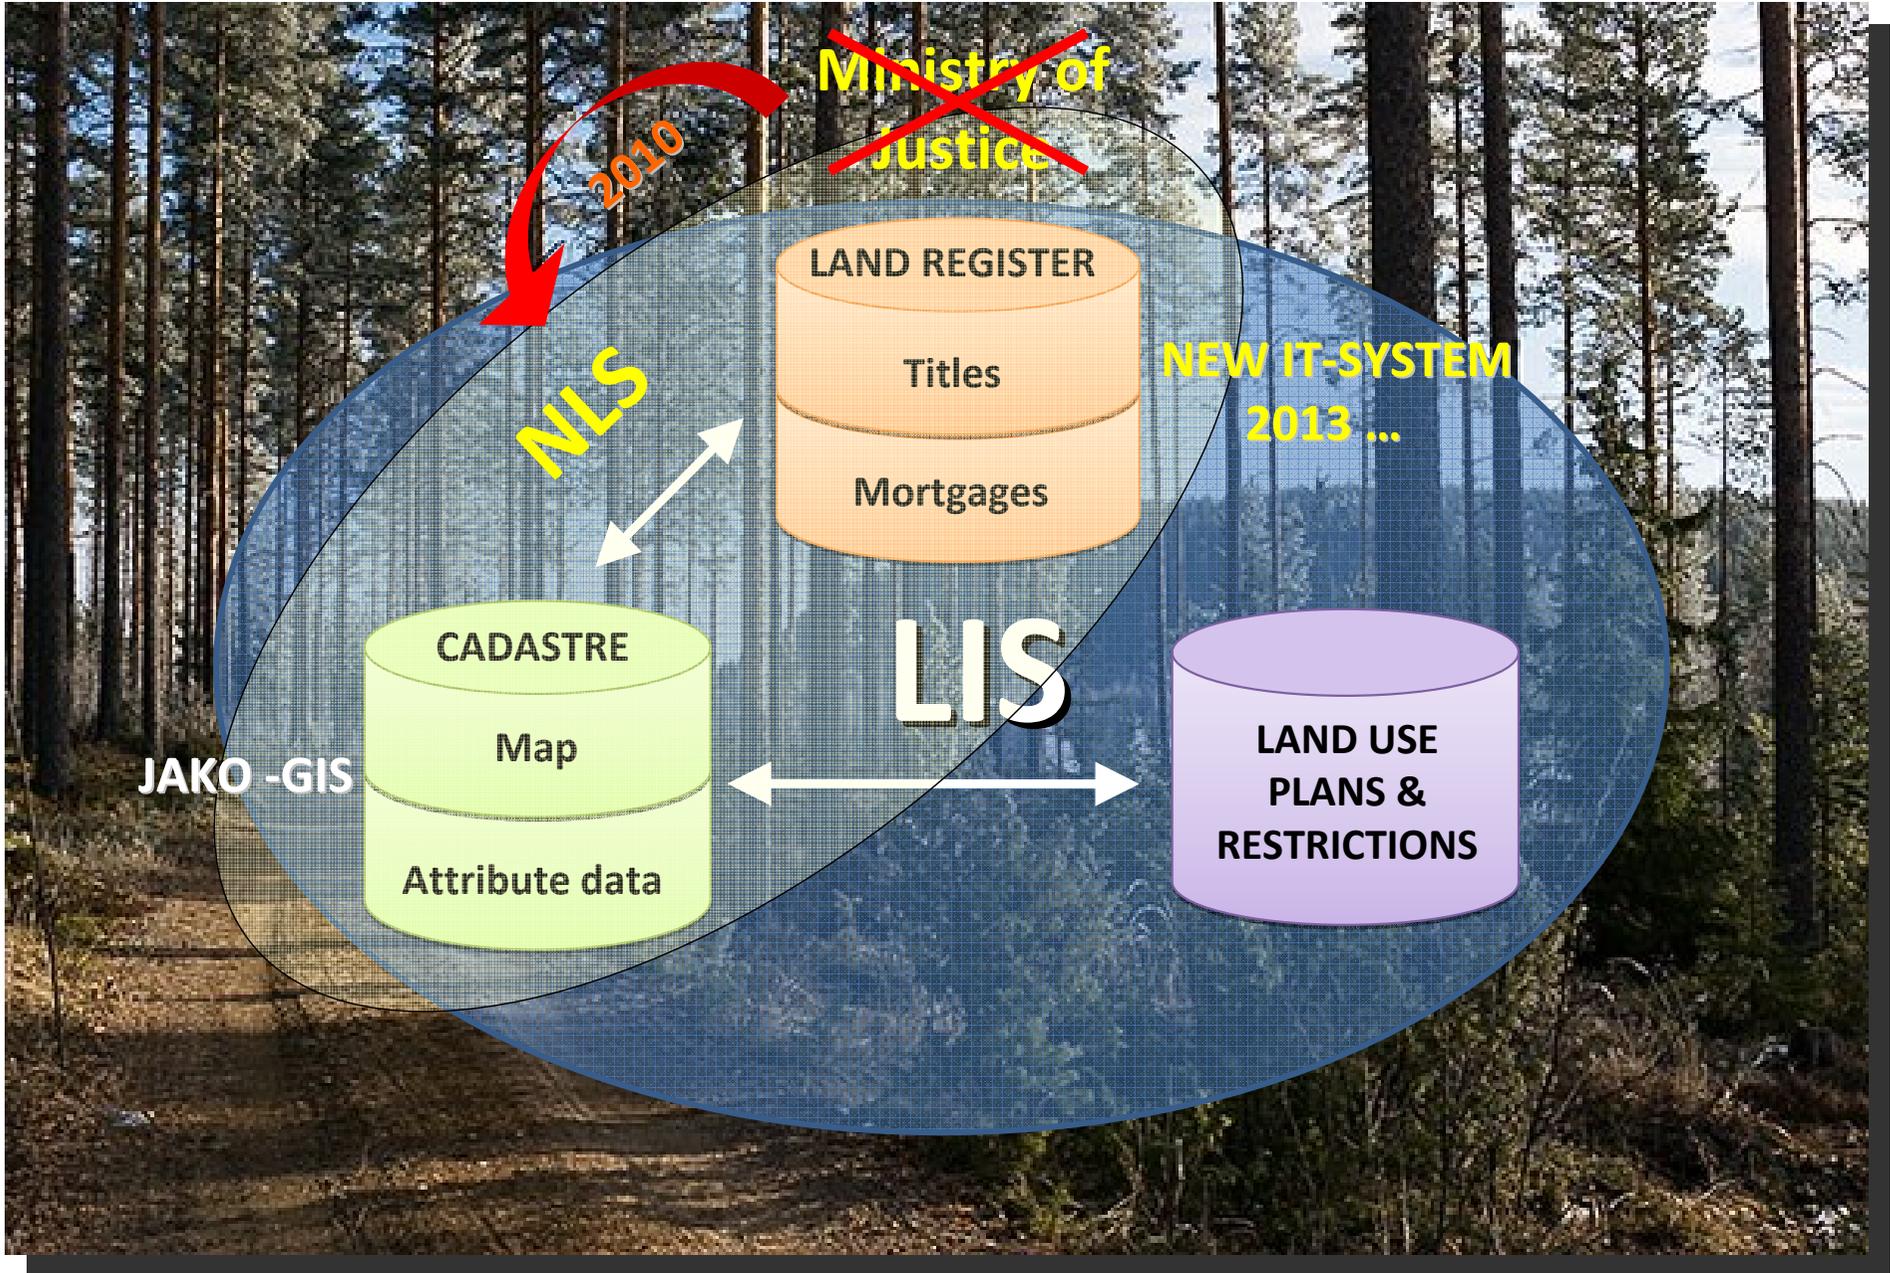

- Title and Mortgage Register from Ministry of Justice to National Land Survey (NLS)
 - Invitation for the 'Finnish National Geoportal Piloting Version' bids until 26th September 2008
 - Towards 3D Registration
- All Produced Cadastral Survey Documents Automatically into the Digital Archive 2009

TITLE AND MORTGAGE REGISTER FROM MINISTRY OF JUSTICE TO THE NATIONAL LAND SURVEY (NLS)

- Transfer of the **land registration** operations (with their personnel) from the district courts to the NLS will take place on **January 4th 2010**
- The registration duties will be integrated as a part of core process structure of the NLS
- The forum for land registration is the District Survey Office (DCO) closest to the location of the property
- Legal support is arranged by establishing an adequate number of new positions in the DSO
 - The current data system will be modernized later
 - The Governments Productivity Program will be taken into account

INVITATION FOR THE 'FINNISH NATIONAL GEOPORTAL PILOTING VERSION' BIDS UNTIL 26TH SEPTEMBER 2008

- is the latest stage of the National Geoportal Project
- The Geoportal will fulfill the requirements of the INSPIRE directive
 - The pilot will be in use during 2009
 - The FNGP will be in use in 2010

Spatial Data Infrastructure	Services	Information and Events	Co-operation
<i>Spatial Data Infrastructure National Spatial Data Infrastructure</i>			
National Spatial Data Infrastructure of Finland			
<p>On July 21, 2001 the Finnish Government appointed a council, which among other things was commissioned to take steps to prepare a national geographic information strategy. The council took as its strategic task to advance cross-sector collaboration with the objective of developing a spatial data infrastructure meeting both national and international needs. In 2003 the preparation of a strategy was included as an objective into the Government Information Society Programme.</p> <p>The National Geographic Information Strategy focuses on describing principles, objectives and measures deemed appropriate for the development of a spatial data infrastructure in Finland. A successful implementation of the strategy will result in a more efficient and diverse use of the databases available, the emergence of new services and better access to information. It will also, for its part, provide a good framework for the development of a national information society and for international cooperation.</p> <p>The strategy also takes into account the preparation of the INSPIRE directive (COM (2004) 516) for the establishment of a European Spatial Data Infrastructure.</p> <p>The Country report on SDI "Spatial Data Infrastructures in Finland: State of play" is published on Autumn 2006 in the context of a study commissioned by the EC (EUROSTAT) in the framework of the INSPIRE initiative.</p>			

Link of the month

TOWARDS 3D REGISTRATION

'3D Committee' of the Ministry of Agriculture and Forestry (MAF, responsible for land surveying and cadastres) SUGGESTS (2008):

- **"The 3D cadastre possible in Finland."**
- **"Working Group for legal preparations"**
- **"NLS and the Municipalities studying the technical and functional solutions and their costs"**
 - **"The Ministry of Environment evaluating the instructions for the detailed planning and permissions"**

All Produced Cadastral Survey Documents Automatically into the Digital Archive

- **Production of cadastral maps, other cadastral survey documents and updating the cadastre has been fully automated (JAKO-GIS) since 1998**
- **In the beginning of year 2009 all these documents will be automatically transferred into the (DIGITAL) CENTRAL ARCHIVE**
- **These and in the long run also all the historical maps and other documents are available on Archives Web-service**

All Produced Cadastral Survey Documents Automatically into the Digital Archive

JAKO-GIS

- Cadastral mapping
 - Basic surveys
 - Valuation surveys
 - Reallotments
- Handling all rights etc.
 - Producing all legal survey documents
- Updating the cadastre and cadastral map
 - Data output for several other systems

DIGITAL CENTRAL ARCHIVE

- All new legal survey documents from JAKO
- Historical documents
 - Web -service

**NO MORE PAPER DOCUMENTS
ARCHIVED !**
