

Securing land rights for the world

Paper 7502 – FIG Working Week 2015
Kees de Zeeuw and Christiaan Lemmen

Kees de Zeeuw *MSc*
Director Kadaster International
The Netherlands

Land administration

- For all
- Within one generation

- Is it feasible?

Need for land administration

- Poverty, slow economic growth
- Corruption and inequity
- No sustainable development

What's the problem?

- 600 – 1200 years of work?
- 5 – 2000 US\$ per parcel?
- > 100 Billion US\$ budget?

- New thinking
- New technology
- Leadership
- Capacity
- Action!

Leadership and action

- Different professional worlds converge
- Global initiatives
- National initiatives
- Private sector role
- Community based initiatives

New thinking

Aid, trade and investment

National initiatives are needed

Multi Stakeholder Dialogue on Land Governance – The Netherlands

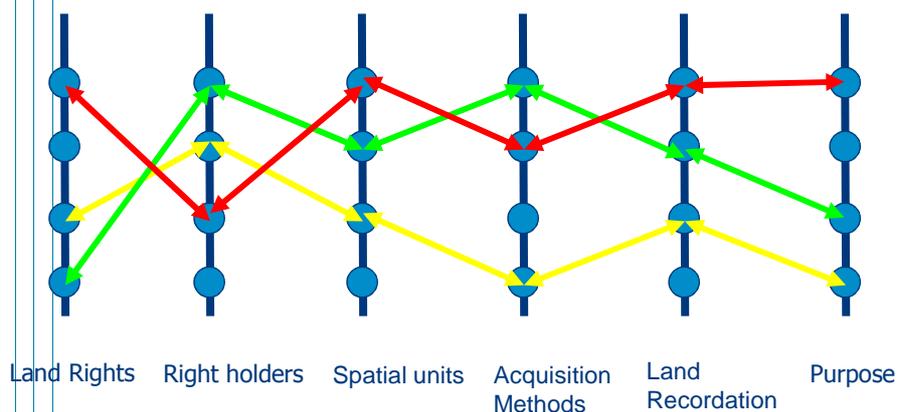

- Food security
 - Gender, Women rights
 - Water, environment and climate
 - Security, justice and good governance
-
- A good cadastral system is part of the chain in all four theme's

'Hulp en handel
gáán samen'

Land is de basis van de voedselproductie en de levenswijze van de bevolking. Het is de basis van de economie en de maatschappij. Het is de basis van de veiligheid en de soevereiniteit van een land. Het is de basis van de identiteit en de cultuur van een land. Het is de basis van de toekomst van een land.

Methods: Fit for Purpose 'Equalizer'

Criteria: Quality, cost, time

Requirements: standards (LADM), Software, Capacity

New technology

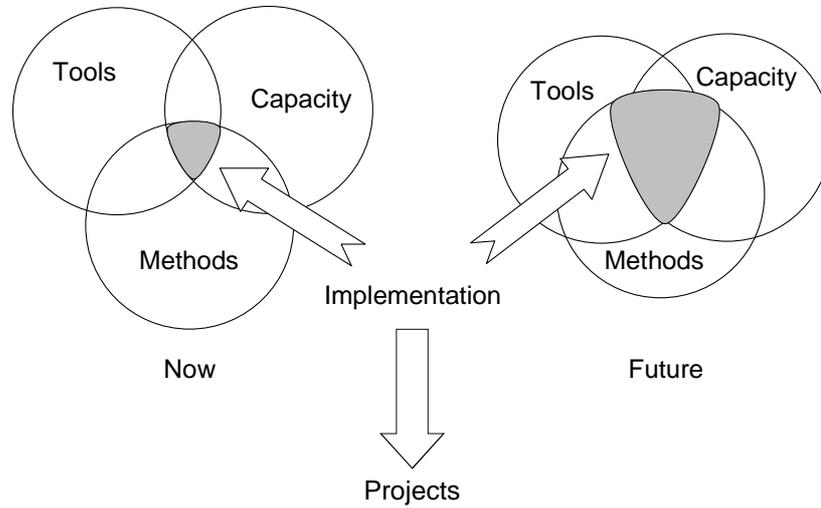

Public Private Partnership

- Shared ambition
- Private sector is user-centric
- Governments are citizen centric

Implementation

New paradigm

Conclusion

- Securing land rights for the world **is** possible
 - Fit for Purpose
 - Within one generation
 - At a reasonable cost
- Methods, tools and capacity
- United (Public, private, NGO's, science, community based)
- Leadership
- Action in projects
- Let's make it happen!
